DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of group I in the reply filed on 10/22/07 is acknowledged. The traversal is on the ground(s) that the method shares the structure of group II, however the examiner mentioned that the apparatus of group II does not require the method of group I.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 18-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group II, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 10/22/07.

3. This application contains claims 18-21 drawn to an invention nonelected with traverse in the reply filed on 10/22/07. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 23 is rejected under 35 U.S.C. 102(b) as being anticipating by Sugiura et al. (US 6,220,019 B1).

6. Sugiura et al. discloses a hybrid vehicle comprising wheels 5, engine 1, electric machine or motor/generator 3, converter (not shown), super-capacitor 14, and controller 13 which inherently includes semiconductors for controlling the motor and voltage of the super-capacitor, wherein said motor is engaged when the vehicle speed reaches a predetermined speed and acts as a regenerative brake for supplying power to the super-capacitor, as shown in figure 1.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sugiura et al., as applied to claim 23 above.

Sugiura et al. does not explicitly disclose at what speeds the motor is used to power the vehicle. The exact speed is not viewed as critical to the invention and unless the specific speed produces an unexpected result, little patentable weight will be given to the specific speed that the motor powers the vehicle alone and therefore it would have been obvious to one having ordinary skill in the art at the time of the invention to

have cut the engine of the hybrid vehicle of Sugiura et al. at 20, 30 mph, or any other speed in order to save on emissions from burning fuel in the engine.

Allowable Subject Matter

9. Claims 24-26 are allowed.

Response to Arguments

10. Applicant's arguments with respect to claims 23 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3618

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
